Protecting Our Quality of Life.

- I convinced Markham Council to purchase the **22.4-acre Shouldice Hospital property**, protecting it from a massive 5-building condominium redevelopment and preserving it as parkland for us and future generations to enjoy.
- I led the replacement of the **Huntington Park pedestrian bridge**, now enjoyed by more than 15,000 of us every year.

Safer Streets. Better Infrastructure.

- **Made crossing Steeles Avenue safer** by championing new traffic control signals at Waggoners Wells Lane, improving safety for pedestrians crossing five lanes of traffic and for motorists travelling east and west on Steeles Avenue.
- **Reduced congestion on John Street** by securing dedicated left-turn lanes at Steelcase Road, improving traffic flow for motorists and public transit while helping reduce gridlock in and out of Thornhill.
- **Improved safety at Laureleaf Road and Steeles Avenue** by overseeing the installation of eight permanent safety bollards to prevent dangerous corner-cutting and illegal turning movements that placed pedestrians at risk.

Keeping You Informed

I have kept residents informed through **14 editions of Ward 1 News,** delivering timely updates on local issues, Council decisions, development applications, parks, traffic, and community events. Residents often tell me it's "news they can use" and they eagerly anticipate receiving it. Together with my website, markhamward1.ca, it helps residents stay informed, engaged, and connected to the community we proudly call home.

How You Can Help

With your help I know we will continue accomplishing great things for Thornhill and our city. There are lots of ways you can make a difference: volunteer, donate, host a lawn sign. May we place a small sign on your lawn?

Please let us know at www.keithirish.ca or by email to keith@keithirish.ca
